(801) 372-4562 | mail@garrettsoutham.com | [linkedin.com/in/garrettsoutham](https://www.linkedin.com/in/garrettsoutham)

SUMMARY

Junior software engineer with hands-on experience developing automation tools and working in QA/SDET roles. Skilled in object-oriented design, test-driven development, and data analysis. Experienced building reliable software systems and collaborating across teams to improve performance and efficiency.

SKILLS

Programming Languages: C#, C, C++, Java, Python

Frameworks & Tools: .NET, Git, Linux (Debian, Arch)

DevOps & Testing: CI/CD, Automated Testing (JUnit, Playwright)

Data Analysis & Automation: Data Analysis, Excel and VBA, Pandas/NumPy/Matplotlib

EXPERIENCE

Wavetronix

Sep 2019 - Present

Engineering Assistant

- Maintained radar test sites as a platform for new product testing and firmware development.
- Collaborated with software developers, engineers, and QA testers in Agile Scrum environments to streamline the site analysis process, resulting in dramatic improvements to the speed and detail of data feedback.
- Used internal tools for device monitoring, firmware updates, and log analysis.
- Built dashboards and visualization tools to present test data to company leadership on a weekly and monthly basis.

Wavetronix

Sep 2017 - Jan 2020

Production Assembler

- Assembled and tested radar sensors to meet manufacturing standards, processing hundreds of sensors daily.
- Collaborated with QA and hardware engineering teams to identify and resolve hardware issues.

EDUCATION

Brigham Young University

Graduation Dec 2025

B.S. in Computer Science

Coursework: C, C++, Java, Python, Data Structures, Discrete Mathematics, Web Programming, Linux systems (C/x86), Computational Theory, Calculus, Physics.

ADDITIONAL EXPERIENCE

Shakespeare Coeur d'Alene Technical Team / PGHS Tech

Technical Director and Theatrical Lighting Designer

- Led technical theater teams for both student and professional theater performances.
- Gained hands-on experience in leadership, creative design, and technical coordination.
- Ensured smooth operation of complex lighting and audio systems in high-stress situations.
