SUMMARY

Computer Science graduate with hands-on experience supporting hardware/software systems, maintaining technical test environments, building automation tools, and troubleshooting device, network, and data issues. Experienced working across software, QA, and hardware teams to improve system reliability and operational efficiency.

SKILLS

Programming & Scripting: C#, C, C++, Java, Python, SQL, JavaScript/TypeScript

Systems & Tools: Linux, Windows, Git, Docker, Bash, SSH, Azure DevOps, CI/CD

Data & Reporting: Excel, VBA, Pandas, NumPy, Matplotlib, dashboards, log analysis

Testing & Troubleshooting: Automated testing, JUnit, Playwright, device monitoring, issue investigation

EXPERIENCE

Wavetronix

Sep 2019 - Present

Engineering Assistant

- Maintained radar test sites used for product validation, firmware development, device monitoring, and reliability testing.
- Collaborated with software developers, engineers, and QA testers in Agile Scrum environments to streamline the site analysis process, resulting in dramatic improvements to the speed and detail of data feedback.
- Built dashboards and visualization tools to summarize test data, recurring issues, and system performance for engineering and leadership review.

Wavetronix

Sep 2017 - Jan 2020

Production Assembler

- Assembled, tested, and inspected radar sensors in a production environment, processing high daily hardware volume while meeting quality standards.
- Worked with QA and hardware engineering teams to identify, document, and resolve manufacturing and device issues.

EDUCATION

Brigham Young University, *B.S. Computer Science*

Graduated Dec 2025

Relevant Coursework: Linux Systems Programming, C/x86, Data Structures, Web Programming, Databases/SQL, Java, C++, Python, Computer Systems, Discrete Mathematics, Physics.

ADDITIONAL EXPERIENCE

Shakespeare Coeur d'Alene Technical Team / PGHS Tech

Technical Director, Lead Lighting Designer, Light Board Operator

- Led technical theater teams for student and professional performances.
- Installed, configured, and operated lighting/audio systems, troubleshooting equipment and solving technical issues under time-sensitive conditions.
